IMPORTANT RULES of THUMB (Individual results may vary.)

* If you choose for a gold(plated) LefreQue it is recommended to match the gold(plating) of your lefreQue with the gold(plating) on your instrument. This could be the gold(plating) of the headjoint/mouthpiece/ligature, body or other features like the riser, crown, tab rings or keywork.

** For flute, the 41mm lefreQue gives as much improvement to the overtones as the 33 mm but will result in a bigger sound.

*** 106 mm is optional on these instruments to skip the barrel and land directly on the full tube for even more effect.

GOLD Solid gold is our superlative and always makes the sound more brilliant.
This is our premium line.

How to try:

Individual exercises

- Play a chromatic scale (long notes without vibrato). Play it with, without and then with lefreQue again. **Pay attention to intonation and evenness of tone production.**
- Play octaves. Play it with, without and then with lefreQue again. Listen to your tone as if you play a duet with your own overtones. **Pay attention to the difference in tuning with and without lefreQue.**
- Play different fragments outside your comfort zone with difficult slurrings or intervals. **Feel the differences in ease of playing and pay attention to your intonation.**

Joint exercise

- Play a scale together (long notes and without vibrato). Play it with, without and then with lefreQue again. First unisono and then in octaves. **Listen to the difference in tuning and projection.**
- Play a duet with any other wind instrument. and pay attention to the differences in intonation.

We hope you enjoy these exercises. Thanks for trying lefreQue!

Universal Manual & Choose your lefreQue for Flute / Piccolo

Important !!!

Always place the
plate with dots on top

Grab the band with
your thumb and
middle finger

Band over the ball

Always place your lefreQue at the side where
the tube of your instrument is most free!
